

# Luxury Hybrid Jewelry Platform

## Frontend SDD (Spec Driven Development) Blueprint

### Phase Wise Frontend UI Development Plan

#### Roman Urdu Version

---

## 1. Project Introduction

Ye document specifically frontend development ke liye banaya gaya hai.

Hum pura frontend:

- Spec Driven Development (SDD)
- AI Prompt Engineering
- Antigravity Style UI Generation
- Modular Component Architecture
- Luxury UI System

ke through build karenge.

Is document ka purpose:

- Har phase clear karna
  - Har page define karna
  - Har UI behavior explain karna
  - Har animation system plan karna
  - AI prompts standardize karna
  - Frontend architecture scalable banana
- 

## 2. Frontend Development Vision

Hum aik HIGH-END luxury jewelry experience build kar rahe hain.

Website ka feel hona chahiye:

- Cinematic
- Elegant
- Smooth
- Premium

- Minimal
- Emotional
- High Fashion Brand Style

Inspiration:

- Cartier
- Rolex
- Bulgari
- Tiffany

Frontend objective: User ko website open karte hi luxury feel ana chahiye.

### 3. Frontend Tech Stack

| Technology         | Purpose                 |
|--------------------|-------------------------|
| Next.js App Router | Main frontend framework |
| JavaScript         | Core development        |
| Tailwind CSS       | Styling system          |
| Framer Motion      | Premium animations      |
| Redux Toolkit      | Global state            |
| Axios              | API communication       |
| React Icons        | Icons                   |
| GSAP (Optional)    | Cinematic effects       |
| Lenis              | Smooth scrolling        |
| Cloudinary         | Optimized images        |

### 4. Frontend Architecture

```
src/
|
├─ app/
├─ components/
├─ sections/
├─ layouts/
├─ features/
├─ redux/
├─ hooks/
├─ services/
├─ animations/
```

```
|— constants/  
|— lib/  
|— utils/  
|— styles/  
|— providers/  
|— middleware/
```

## 5. SDD (Spec Driven Development) Workflow

Hum direct coding nahi karenge.

Har feature ka flow:

```
Idea  
↓  
Feature Spec  
↓  
UI Spec  
↓  
Component Spec  
↓  
Animation Spec  
↓  
AI Prompt  
↓  
Generated UI  
↓  
Refinement  
↓  
Production Integration
```

## 6. Antigravity UI Workflow

Hum Antigravity style prompting use karenge.

Har page AI prompts se generate hoga.

Workflow:

```
Feature Spec  
↓  
Detailed UI Prompt  
↓
```

Antigravity Generation  
↓  
Generated React Component  
↓  
Optimization  
↓  
Integration

## 7. Global Design System

### Theme

Luxury Black + Gold

### Main Colors

| Color   | Usage       |
|---------|-------------|
| #0A0A0A | Background  |
| #D4AF37 | Gold Accent |
| #1A1A1A | Cards       |
| #F5F5F5 | Text        |
| #2C2C2C | Borders     |

## 8. Typography System

### Fonts

| Font               | Usage           |
|--------------------|-----------------|
| Playfair Display   | Luxury headings |
| Cormorant Garamond | Elegant titles  |
| Poppins            | UI text         |

## 9. Animation System

### Global Animations

#### Effects

- Fade In
  - Smooth Reveal
  - Gold Glow Hover
  - Parallax Scroll
  - Blur Reveal
  - Cinematic Hero Motion
  - Floating Jewelry Animation
  - Hover Lift Cards
  - Smooth Route Transitions
- 

## 10. Frontend Development Phases

### PHASE 1 — FOUNDATION SETUP

#### Objective

Project architecture + design system setup.

#### Tasks

##### 1. Next.js Setup

- App Router
- ESLint
- Absolute imports

##### 2. Tailwind Setup

- Theme variables
- Colors
- Shadows
- Typography

##### 3. Layout System

- Main layout
- Container system
- Responsive grid

#### 4. Animation Setup

- Framer Motion
- Page transitions
- Scroll animations

#### 5. Redux Setup

- Store configuration
- Auth slice
- Cart slice
- Wishlist slice
- UI slice

#### 6. API Layer

- Axios instance
  - Interceptors
  - Token handling
- 

## PHASE 2 — CORE UI SYSTEM

### Objective

Reusable luxury component system build karna.

### Components

#### Buttons

- Primary Gold Button
- Outline Button
- Glass Button
- Hover Glow Button

#### Cards

- Product Card
- Collection Card
- Category Card
- Testimonial Card

#### Inputs

- Luxury Input
- Floating Label Input
- Search Input

## UI Elements

- Modals
  - Drawers
  - Tooltips
  - Dropdowns
  - Tabs
  - Accordions
  - Skeleton loaders
- 

# PHASE 3 — LANDING EXPERIENCE

## Objective

Luxury homepage build karna.

---

## Homepage Structure

### 1. Intro Loader

#### Features

- Black screen intro
  - Gold logo animation
  - Cinematic reveal
- 

### 2. Mode Selection Popup

#### Modal Content

"How Would You Like To Shop?"

#### Options

1. Wholesale Raw Materials
2. Luxury Jewelry Collection

#### Effects

- Glassmorphism modal
  - Gold hover effect
  - Smooth transitions
-

### 3. Hero Section

#### Features

- Fullscreen cinematic hero
  - Luxury typography
  - Slow motion animations
  - Gold lighting effect
  - CTA buttons
- 

### 4. Featured Collections

#### Layout

Large luxury cards.

#### Features

- Hover zoom
  - Glow borders
  - Reveal animations
- 

### 5. Premium Product Showcase

#### Features

- Horizontal luxury slider
  - Cinematic transitions
  - Large images
- 

### 6. Brand Story Section

#### Features

- Emotional storytelling
  - Premium typography
  - Cinematic image layout
- 

### 7. Instagram Luxury Gallery

#### Features

- Masonry layout
- Hover animations
- Gold overlay

---

## PHASE 4 — RETAIL SHOP UI

### Objective

Luxury jewelry shopping experience.

---

## Retail Pages

### Pages

- Shop Page
  - Product Details
  - Collections
  - Wishlist
  - Cart
  - Checkout
  - Account Dashboard
- 

## Product Page Features

### Left Side

- Zoom gallery
- 360 view
- Large images

### Right Side

- Pricing
- Variants
- Reviews
- Add to cart
- Wishlist

### Premium Effects

- Image glow
  - Luxury hover
  - Smooth transitions
-

# PHASE 5 — WHOLESALE UI

## Objective

Dealer-focused dashboard.

---

## Wholesale Features

### Pages

- Dealer Dashboard
  - Bulk Products
  - MOQ Products
  - Quotation Requests
  - Bulk Orders
  - Invoice History
- 

### Dealer Dashboard

#### Widgets

- Revenue
  - Orders
  - Quotations
  - Inventory
  - Dealer pricing
- 

# PHASE 6 — AUTHENTICATION UI

### Pages

- Login
  - Register
  - Forgot Password
  - OTP Verification
- 

### UI Style

- Glassmorphism cards
- Luxury background
- Gold gradients
- Cinematic forms

---

# PHASE 7 — ADMIN PANEL UI

## Objective

Enterprise admin system.

---

## Admin Modules

### Dashboard

- Analytics
- Revenue charts
- Orders graph

### Products

- Product CRUD
- Bulk upload
- Categories

### Users

- Customers
- Dealers
- Admins

### Orders

- Tracking
- Shipment
- Refunds

### CMS

- Banners
  - Collections
  - SEO
-

# 11. Responsive Design Rules

## Mobile First

### Breakpoints

| Device  | Width  |
|---------|--------|
| Mobile  | 320px  |
| Tablet  | 768px  |
| Laptop  | 1024px |
| Desktop | 1440px |

---

# 12. Luxury UI Rules

## UI Principles

### 1. Spacing

- Large spacing
- Clean layout
- Breathing room

### 2. Typography

- Elegant fonts
- Large headings
- Cinematic text

### 3. Motion

- Slow premium transitions
- No aggressive animation

### 4. Hover Effects

- Gold glow
  - Subtle scaling
  - Glass reflection
-

## 13. AI Prompt Engineering Rules

### Prompt Structure

```
You are a senior luxury UI designer.  
Create a cinematic luxury jewelry homepage.  
Use:  
- Next.js  
- Tailwind CSS  
- Framer Motion  
  
Theme:  
Luxury black and gold.  
  
Style:  
- Minimal  
- Elegant  
- Cinematic  
- High-end  
- Premium  
  
Requirements:  
- Fullscreen hero  
- Glassmorphism  
- Gold glow effects  
- Smooth animations  
- Large luxury typography  
- Responsive layout
```

---

## 14. Antigravity Prompt Rules

### Important Rules

Har prompt me include karna:

- Luxury UI
  - Cinematic feel
  - Black and gold theme
  - Framer Motion animations
  - Responsive design
  - Premium spacing
  - Elegant typography
  - Production-ready code
-

## 15. Component Naming Rules

### Example

```
LuxuryHero.jsx  
GoldButton.jsx  
PremiumNavbar.jsx  
JewelryCard.jsx  
LuxuryFooter.jsx  
DealerSidebar.jsx
```

## 16. Folder Structure (Frontend)

```
src/  
├── app/  
│   ├── (retail)/  
│   ├── (wholesale)/  
│   ├── admin/  
│   └── api/  
├── components/  
│   ├── ui/  
│   ├── cards/  
│   ├── buttons/  
│   ├── forms/  
│   └── layout/  
├── sections/  
│   ├── home/  
│   ├── retail/  
│   ├── wholesale/  
│   └── admin/  
├── redux/  
├── services/  
├── hooks/  
├── styles/  
├── animations/  
└── utils/
```

## 17. Frontend State Management

### Redux Slices

```
redux/  
|  
├─ authSlice.js  
├─ cartSlice.js  
├─ wishlistSlice.js  
├─ uiSlice.js  
├─ wholesaleSlice.js  
└─ productSlice.js
```

---

## 18. Performance Rules

### Must Implement

#### Optimization

- Lazy loading
- Image optimization
- Dynamic imports
- Code splitting
- Skeleton loading
- CDN images

#### Target

- Lighthouse 90+
  - Fast first paint
  - Smooth 60fps animations
- 

## 19. Frontend Security

### Rules

- Protected routes
  - Secure tokens
  - API validation
  - Sanitized forms
  - Role-based rendering
-

## 20. Final Frontend Vision

Ye frontend normal eCommerce jaisa nahi lagna chahiye.

User ko feel ana chahiye:

- luxury brand website
- cinematic fashion experience
- premium jewelry showcase
- emotional storytelling

Frontend hona chahiye:

- scalable
  - modular
  - AI-friendly
  - SDD-based
  - animation-driven
  - production-ready
- 

## 21. Recommended Next Step

Ab humara next step:

### STEP 1

Foundation setup

### STEP 2

Design system

### STEP 3

Homepage UI generation using AI prompts

### STEP 4

Reusable luxury component library

### STEP 5

Retail + Wholesale flows

---

## 22. Recommended First Pages To Build

Priority order:

1. Luxury Loader
  2. Mode Selection Modal
  3. Premium Navbar
  4. Cinematic Homepage
  5. Product Card System
  6. Collections Section
  7. Footer
  8. Product Details Page
  9. Cart
  10. Wholesale Dashboard
- 

## 23. Main Development Strategy

Hum:

- pehle UI banayenge
- phir reusable system banayenge
- phir backend integrate karenge
- phir optimization karenge

Is project ka strongest part hoga:

- UI/UX
- luxury feel
- animations
- modular architecture
- AI-assisted frontend generation
